

For Immediate Release

Adrian L. Melnyk Appointed as New President Of Autosplice

San Diego, CA - August 4, 2009 – Autosplice has named Adrian L. Melnyk as President of the Company's worldwide operations.

According to Irwin Zahn, Chairman and founder of Autosplice, “For over fifty years Autosplice has provided customers innovative electrical/electronic interconnect solutions and application equipment. Our future direction is focused on higher value added products and technology platforms that we can support in all regions of the world utilizing Autosplice's global manufacturing foot print. Adrian's extensive background, experience and proven leadership skills complements this future direction and I am pleased to announce his appointment as President of Autosplice.”

Adrian said, “Autosplice is at an exciting time in its history. The Company has grown in the past by providing custom solutions for pins and terminals, insertion equipment and printed circuit board assemblies. Our future growth is more dependent on our ability to provide engineered solutions to total customer needs where we can be a turnkey supplier. We have achieved success in this area in many new industries—and we plan on doing much more in the future. We are well positioned to provide that total solution.”

Adrian is a change and results driven leader with almost 30 years of experience in the interconnect industry in engineering, operations and general management. Prior to joining Autosplice, he had been with FCI since 2000 and most recently served as the Vice President and General Manager of the Americas' Electronics Division. Previously, he spent twenty years with AMP/Tyco Electronics in various positions including Director of High Speed Products and Director of Global Manufacturing for Connector.

Adrian holds a Masters of Business Administration from York College of Pennsylvania, a Masters of Science in Manufacturing Systems Engineering from Lehigh University and a Bachelor of Science in Industrial Engineering Pennsylvania State University.

Founded in 1954, Autosplice is recognized throughout the world as a leading supplier of innovative interconnect terminals, component assemblies, and automated applicator systems. Autosplice's standard products and custom-engineered solutions are vital production elements used in electronics, automotive, telecommunications and other key industry segments, providing automated solutions for high-volume electrical interconnections. Autosplice systems enable substantial cost savings and provide superior reliability over conventional connector products and assembly methods.
